

Managed Firewall

Key Benefits

- Bespoke specification
- 24/7 monitoring
- Firmware updates
- Logging and reporting
- Remote VPN Access
- Site-to-Site VPN
- Advanced Hardware Replacement

The Challenge

The internet is a dangerous place. The multitude and versatility of Internet threats, such as viruses, worms, hackers, and zero-hour attacks, requires a host of different solutions. These are often difficult to integrate and necessitate a large financial investment to ensure the security, availability, and secure accessibility of corporate resources.

You need a cost-effective, all-in-one, reliable and flexible Internet security and VPN solution that is easy to manage.

The Solution

adept4's Managed Firewall service is a cost-effective means of ensuring that your company's data is kept secure.

Our security experts are focussed on delivering round the clock monitoring of your firewall ensuring that your network is protected.

Designed for small and medium organisations, adept4's Managed Firewall service delivers proven Internet security, providing a solid line of defence against threats ranging from hacking attempts

and bot-net attacks to phishing and ActiveX-based script viruses.

The service incorporates the same patented Check Point security technology that is deployed by 97% of the US Fortune 500 companies

Reporting

The adept4 Managed Firewall service turns the vast amount of data collected from security devices into usable management information. Security reports are automatically generated and emailed to customers on a monthly basis. Additionally reports are always available through the adept4 reporting portal.

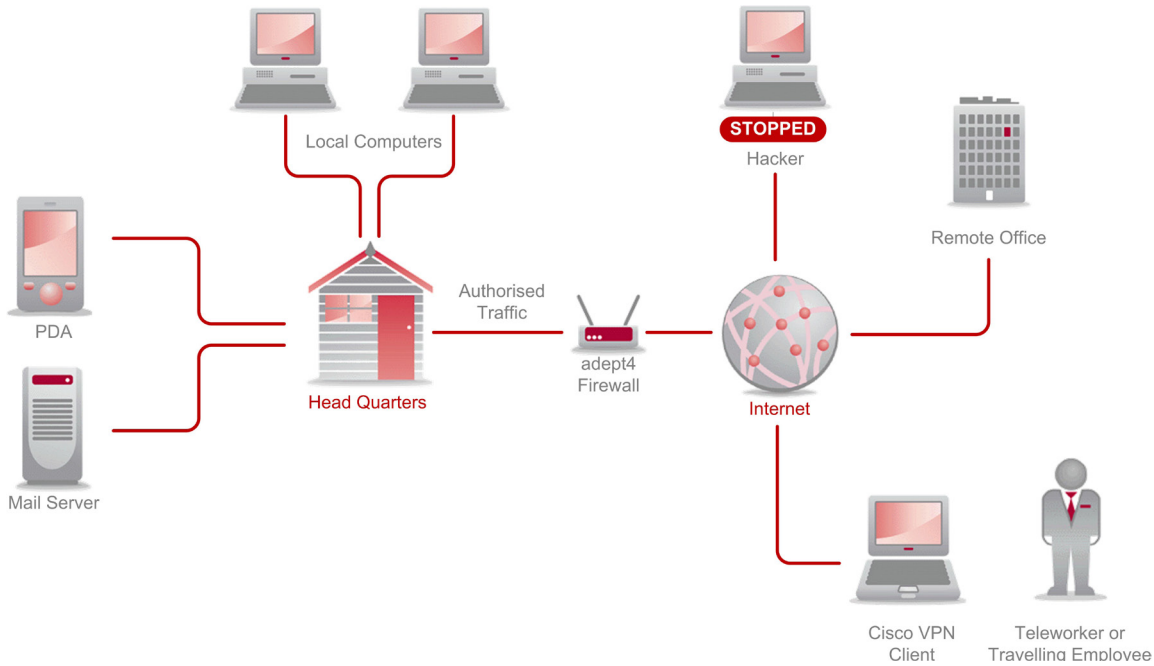

Options

The Managed Firewall service can be extended to include additional security features which can be added at any point in the life of the contract.

- Gateway Anti-Virus
- Regular Vulnerability scanning
- Web content filtering
- VPN Upgrades
- Wireless Gateway Option (must be specified at start of contract)
