

an adept4 storage service

Managed Storage

Key Benefits

- No tape to malfunction
- Fully automated service
- Low, predictable service costs
- Reduced data storage costs
- 24/7 fully managed service
- Data Deduplication
- Encrypted data storage and transfer

The Challenge

The data a business holds is possibly its most vital asset, and the last decade has seen a dramatic increase in the volume of digital information processing. Bringing with it enhanced legislation surrounding data storage, and recovery.

Despite its importance you may find that you're struggling to find resource motivated to maintain your data backups? Or perhaps the business can't afford to upgrade its vulnerable tape based storage system?

The Solution

The adept4 Managed Storage System is a cost effective alternative to traditional backup methods, replacing conventional and unreliable tape based systems with a fully automated disk-to-disk solution.

Incorporating a fully configured Data Silo plus installation and training, Managed Storage gives organisations true data management, scalability and Business Continuity features - **all for the price of a backup!**

24/7 Centralised Support

The adept4 service desk provides

round the clock management. Following best practice to maximise resilience and minimise system downtime.

Reduced Storage Costs

Utilising data deduplication and compression technologies you only pay for what you need. Plus, you benefit from the adept4 buying power.

“customers typically see 4:1 saving in data storage”

Resilient Data Backup

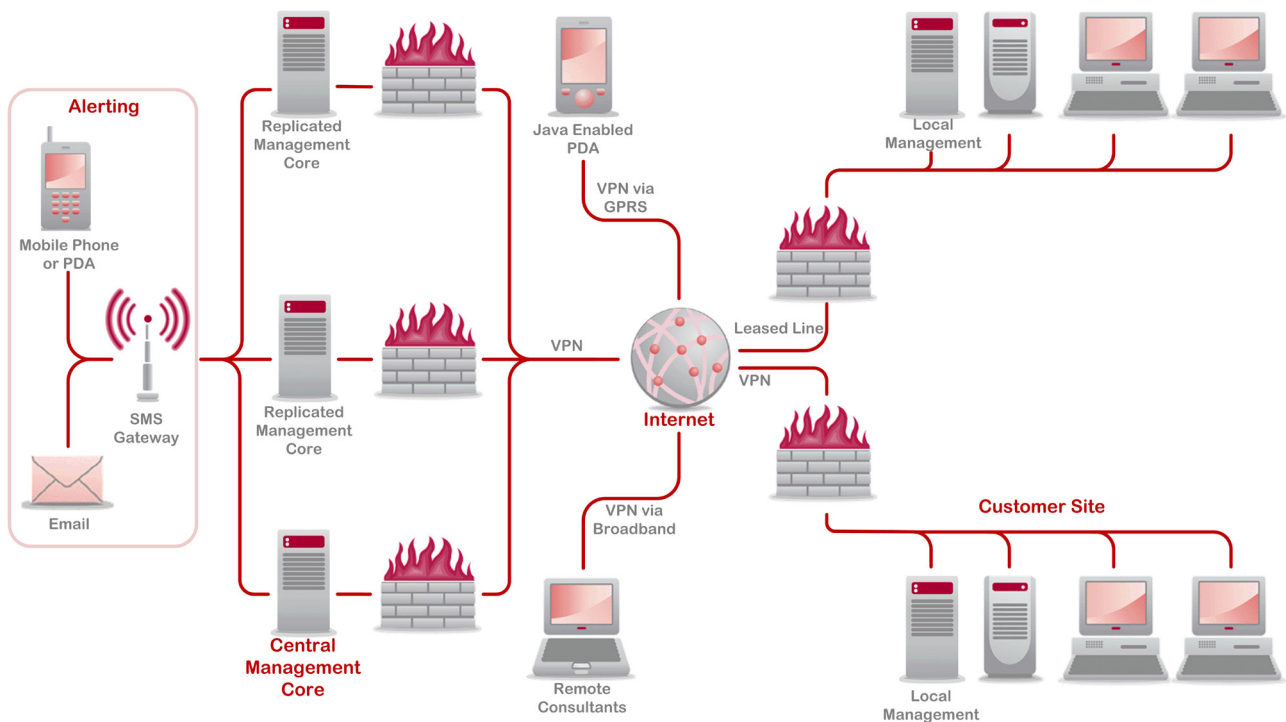

Dual redundancy is included as a minimum, giving you absolute peace of mind that your data remains secure and available. A silo will be installed on site for your primary backup, and a secondary off-site backup system also enabled (with additional resilience applied).

Disaster Recovery

The utilisation of disk based systems, and off site resilience means that storage recovery is more reliable than ever before.

Managed Storage

managed storage architecture

Encrypted Data

Data transfers are fully encrypted, and do not rely on VPN connections.

Flexibility

All solutions are designed and implemented with business growth and development in mind, delivering you a future-proofed storage solution.

Conclusion

Resources are precious and none know your business better than you. Use your resource to deliver strategic business activities whilst we deliver you first class 24/7 storage management. Call us today on 01925 398255.
